DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, drawn to Wireless Internet gateway, classified in class 719, subclass 311.
- II. Claims 29-32, drawn to providing encrypted license to a system, classified in class 713, subclass 153.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in group I has separate utility such as wireless Internet gateway. See MPEP § 806.05(d). Invention in group II has separate utility and provides encrypted license to a system.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are (1) wireless Internet gateway, (2) providing encrypted license to a system.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Art Unit: 2151

Because these inventions are distinct for the reasons given above and the search required for group I is not required for group II, restriction for purpose or examination is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated above is proper.
